

PROPOSALS
for inclusion in the draft normative legal act being prepared to implement
paragraph 14 of Decree of the President of the Republic of Uzbekistan No.
PF-193 of 11 September 2026

Submitted by: Abduxoliq Akmal ugli Ashuraliyev. Edition of 1 October 2026. English companion translation; the Russian edition is primary.

Section I is proposed for inclusion in the act being prepared on the new system for including families in the Social Registry through multidimensional assessment. Section II amends the current Regulation on the Procedure for Maintaining the Social Registry. If the act being prepared replaces that Regulation, the rules of Section II are included in the corresponding norms of the new act. Final numbering is determined by the developer.

Section I. Correctness and verifiability of multidimensional assessment calculations

1. The following basic terms are used in this Section:

multidimensional assessment methodology means the criteria, data sources, scoring rules and threshold values, approved in the prescribed manner, on the basis of which the assessment result is determined;

assessment result means inclusion of a family in the Social Registry with assignment to a category, or refusal of inclusion;

control calculation means determination of the assessment result under the multidimensional assessment methodology without using the software being checked.

2. The multidimensional assessment methodology shall establish, for each criterion, the data source, unit of measurement, reference period and scoring procedure.

3. The multidimensional assessment methodology shall determine, for each threshold value, the category to which a family belongs when its score or income equals that value.

4. The multidimensional assessment methodology shall establish an order of applying exceptions and special procedures under which identical family data correspond to only one assessment result.

5. The multidimensional assessment methodology shall contain calculation examples for each category and for refusal of inclusion, including cases of equality to a threshold value.

6. The assessment result shall be determined in the “Yagona milliy ijtimoiy himoya” information system (hereinafter, the YAMIH system) only under the conditions established by the multidimensional assessment methodology and other normative legal acts.

7. Non-receipt of a reply to an electronic request of the YAMIH system shall not be treated as absence of the family income or property about which information was requested.

8. The National Agency for Social Protection under the President of the Republic of Uzbekistan (hereinafter, the Agency) shall ensure that results of the YAMIH system are compared with control calculations before the multidimensional assessment methodology is first applied and before each change to the methodology or to the YAMIH system software that affects the assessment result is applied.

9. The set of examples for the comparison provided for in paragraph 8 of this Section shall include each threshold value, the case of equality to it and each exception of the multidimensional assessment methodology.

10. A change for which the comparison reveals a difference between the assessment result and the control calculation shall be applied after the difference is eliminated.

11. Comparison results shall be documented among the documents provided for by the established procedure for commissioning and changing information systems.

12. For each assessment result, the YAMIH system shall retain the particulars of the applied edition of the multidimensional assessment methodology, the software version, criterion values with their source and period, the score and the threshold value applied.

13. Assessment results determined under an algorithm temporarily changed in cases provided for by legislation shall be marked in the YAMIH system and, after data exchange is restored, reviewed in the prescribed manner.

14. Together with notification of the assessment result, the applicant shall be provided, through the personal account on the Unified Portal of Interactive Public Services and, on the applicant's request, at an "Inson" social services centre, with information on the values of the family's criteria with their sources and periods, the score, the threshold value applied, the normative incomes applied and the procedure for lodging an objection.

15. Where an assessment result already applied to a family is found to conflict with the multidimensional assessment methodology, the Agency shall identify, using the information provided for in paragraph 12 of this Section, all assessment results affected by the conflict and ensure their review in the prescribed manner.

16. This Section shall be implemented within the funds provided for maintaining and developing the YAMIH system.

Section II. Amendments to the Regulation on the Procedure for Maintaining the Social Registry (Annex 1 to Resolution of the Cabinet of Ministers of the Republic of Uzbekistan No. 35 of 29 January 2026)

The Regulation is officially published in the state language. The exact wording of the amendments in the state language is given in the Uzbek edition of this Material and in the comparison table of Material 2.

1. In the first paragraph of point 26, replace the words “or the amount of transfers is less than twice the minimum wage” with the words “or the monthly average amount of transfers is less than the applicable normative income established by this point”.

2. Supplement point 27, after the sixth paragraph, with a paragraph reading: “If the TEM value determined by the formula is negative, TEM shall be taken as zero.”

3. In subpoint “a” of point 33, replace the words “higher than minimum consumption expenditure” with the words “equal to or higher than minimum consumption expenditure”.

4. Supplement point 37 with a second paragraph reading:

“At the same time, through the personal account on the Unified Portal of Interactive Public Services and, on the applicant’s request, at an ‘Inson’ social services centre, the applicant shall be provided with information on the data on which the decision was based, the normative incomes applied, the decision-making procedure and the procedure for lodging an objection.”
