PROPOSAL
to the draft normative legal act being prepared to implement paragraph 14
of Decree of the President of the Republic of Uzbekistan No. PF-193 of 11
September 2026

Under Article 40 of the Constitution of the Republic of Uzbekistan, Articles 20 and 22 of the Law “On Normative Legal Acts” and Articles 3 and 5 of the Law “On Appeals of Individuals and Legal Entities”, I submit proposals for inclusion in the draft act on the new system for including families in the Social Registry through multidimensional assessment, which the Agency, jointly with the Ministry of Economy and Finance, submits to the Presidential Administration by 1 December 2026.

From 1 January 2027 a family’s category will be determined automatically by a point-based system. The proposals ensure that each family’s assessment result follows only from approved rules, is retained with its grounds and is explained to the applicant as Article 24 of the Law “On Personal Data” and Articles 53–54 of the Law “On Administrative Procedures” require, and they remove inconsistencies in the current Regulation on the Procedure for Maintaining the Social Registry that have been demonstrated by calculation. The proposed norms create no new bodies or information systems. Before first use, the Agency jointly with the Ministry must document the required costs, workload, staffing, contract capacity and funding and obtain the necessary resource decisions (Material 1, Section I, point 23 and Section III, point 5). No personal data of families are requested.

Please compare each proposed duty with the specific applicable norm and, separately, with existing software checks: equivalent tests do not replace the legal basis for a new entitlement condition, while equivalent norms permit removal of duplication. An applicable lawful input restriction or proper interpretation that actually closes a counterexample is accepted; an entitlement-condition amendment

is not replaced by an internal instruction. The distinction and coverage check are set out in Material 2 under “Binding rules and technical implementation”. Agency contract coverage, additional workload and integration cost have not been measured; please assess only uncovered tasks.

I request consideration and an answer on the merits on each of the following questions:

1. Consider including me, with my consent, in the drafting working group or commission under Article 22 of the Law “On Normative Legal Acts” to work on computational specification, control examples and the proposed legal provisions. I hereby consent. I submit the reproducible calculations and draft wording as evidence of the required knowledge and experience; their assessment and the inclusion decision belong to the developer. Please identify the responsible unit for collaboration and use of the materials as scientific recommendations during drafting.
2. Include Section I of Material 1 (points 1–23) or shorter legally equivalent norms, preserving binding decision conditions and applicant rights; reuse existing control examples subject to points 12, 15 and 16. Separately consider, after an independent assessment of legal and fiscal consequences, the coordinated benefit-date provisions in Section II, point 6, Section III, points 4–5 insofar as relevant, and Section IV. If that safeguard is adopted, enact the Presidential and implementing amendments in coordination. Consideration of the core assessment rules is not conditional on adoption of that safeguard.
3. Remove the case in which a family with income *equal to* minimum consumption expenditure is recognized under point 32 of the Regulation but assigned to no category of point 39, by amending subpoint “a” of point 33 (Material 1, Section II, point 3) or by an equivalent legally justified remedy, taking account of the favourable-interpretation rules discussed in Material 2, Section 7.
4. Exclude a negative household-plot area in the formula of point 27 of the Regulation (Section II, point 2).
5. Exclude a fall in counted income when the actual remittance increases, and state the comparison period, in point 26 of the Regulation (Section II, point 1), choosing the option after assessing the aggregate impact of the two options set out in Material 2, Section 10.
6. Ensure that the applicant receives the factual and legal grounds of a decision on inclusion, refusal, change of category or removal, including the applicable provision, the objection procedure, and the time limit and procedure for appeal in accordance with Article 24 of the Law “On Personal Data” and Articles 53–54 of the Law “On Administrative Procedures” (Section II, points 4 and 5).
7. Align points 34–35 and subpoint “v” of point 39 of the Regulation with subparagraph “v” of paragraph 3 of Decree PF-258 and item (i) of note (b)

to its Annex 1: the Regulation includes in the “family at the poverty boundary” category hardship families whose reduced income is below minimum consumption expenditure, which the Decree does not provide for. Select and justify the remedy after resolving how the hierarchy and favourable-interpretation rules apply together (Material 2, Section 7).

8. Take this proposal into account in preparing the draft under Article 23 of the Law “On Normative Legal Acts” and include it in the materials of the discussion of the draft; state when the draft will be placed on the portal for discussion of draft normative legal acts under Article 24 of that Law.

Under Article 27 of the Law “On Appeals of Individuals and Legal Entities”, an appeal is considered when all questions raised in it have been considered and the answer contains concrete grounds on each question. Since the draft is submitted by 1 December 2026, I request consideration of the proposal within the one-month period established by Article 28 of that Law and, if additional study is required, to notify me within ten days as that Article provides. Please state which provisions are included in the draft and in what wording, or which current norm already resolves the question, or for what reason a provision is not accepted.

The attached program reproduces the income-rule control calculations. The explanatory note separately sets out the benefit-calendar example. The set of control examples and the program are provided free of charge; I am ready to demonstrate them to the responsible staff.

Attachments:

1. Material 1. Proposals for inclusion in the draft normative legal act.
2. Material 2. Explanatory note with scientific and legal justification.
3. Electronic supplement: control-calculation program, tests and results.

The primary edition of the materials is Russian; Uzbek and English editions are attached. The Uzbek edition of Material 1 gives the amendments in the state language.
