

EXPLANATORY NOTE
with scientific and legal justification
to the proposals for inclusion in the draft normative legal act being
prepared to implement paragraph 14 of Decree of the President of the
Republic of Uzbekistan No. PF-193 of 11 September 2026

Edition of 7 October 2026. English companion translation; the Russian edition is primary. The structure follows paragraph 84 of the Unified Methodology appended to the Law “On Normative Legal Acts”; the scientific and legal justification is set out in Section 13 as other information needed to justify the draft.

1. Basis for preparation and necessity

Subparagraph “a” of paragraph 13 of Decree PF-193 provides that from 1 January 2027 need is studied and families are included in the Social Registry through a multidimensional assessment system that takes into account, *in addition to the family’s financial condition*, chronic illness, disability, external labour migration and large family size. Subparagraph “b” provides for a point-based scoring of socio-economic condition and assignment of families to categories by its results. Paragraph 14 instructs the National Agency for Social Protection under the President of the Republic of Uzbekistan (hereinafter, the Agency), jointly with the Ministry of Economy and Finance, to submit the draft normative legal act to the Presidential Administration by 1 December 2026[1].

The need for the proposed norms is supported by the following.

First, the decision is made automatically. Under stage 6 of the Scheme for Including Families in the Social Registry (Annex 1 to the Regulation on the Procedure for Maintaining the Social Registry), the “Ijtimoiy reyestr” information module recognizes or refuses a family and assigns its category “automatically”[2]. In a point-based system the category depends on which side of a threshold the score falls. Every threshold, its equality case and every exception therefore directly determine a family’s access to assistance.

Second, the law requires an automated decision to be explained. Article 24 of the Law “On Personal Data” obliges the owner and/or operator to explain to the data subject the procedure for a decision based solely on automated processing and its possible legal consequences, to give the opportunity to object, and to notify the result of considering the objection in writing within ten days[4]. Points 37 and 44 of the Regulation expressly require SMS notification about inclusion, refusal, a change of category or removal from the Registry[2]. If artificial-intelligence technologies are used in the multidimensional assessment, Article 7¹ of the Law “On Informatization” prohibits relying solely on their conclusions when taking legally significant decisions on human rights, and the Ethics Rules (registration No. 3787) require the logic, main algorithmic criteria and data sources to be open

and explainable and the final decision to be taken by a human[16, 17]. Points 3, 7, 17 and 18 of Section I of Material 1 require such explainability whatever the calculation method.

Third, the decision is an administrative act. The Law “On Administrative Procedures” applies to registration procedures and procedures related to the provision of public services (Article 3, part one); the Regulation treats the actions for including a family in the Social Registry as public services (point 47), and Annex 4 to Resolution No. 35 calls the acts of the “mahalla seven” on maintaining the Registry administrative acts and requires complaints against them to be considered under the legislation on administrative procedures (points 3 and 11); the Regulation itself refers disputes on inclusion, category, reassessment and removal to the appeal councils (point 50)[2]. A decision on inclusion, refusal, change of category or removal creates, changes or terminates public-law relations with a specific family and therefore meets the definition of an administrative act (Article 4). Such an act must contain a reasoning part with all factual and legal grounds and the time limit and procedure for appeal; the body may not rely on evidence that participants were not given the opportunity to examine (Articles 53–54). Information submitted by an interested person is considered reliable until the contrary is proved, and information held by other bodies is obtained by the administrative body itself on the one-window principle (Articles 8 and 14); acts establishing special procedures must not worsen the position of persons (Article 2, part two)[15]. The cited notification provisions do not expressly secure disclosure of all these elements; the contents of actual messages sent by the operational system were not examined.

Fourth, practice shows unjustified refusals. The Government portal reported on 17 July 2026 that in 184 mahallas all 2,000 applications received in one month were refused without grounds; appeals to the President on Registry inclusion rose one and a half times since the start of the year, from 30,000 to 46,000; and the Prosecutor General’s Office was instructed to strictly oversee proper maintenance of the Registry[7]. The documented refusals support the proposal’s case for accessible decision grounds and effective correction procedures; the report does not establish that the formulas examined in this note caused those refusals. The World Bank’s 2026 poverty and equity assessment states that the targeting formula was revised in early 2026 and that an assessment of its effectiveness is not yet available[13].

Fifth, four inconsistencies have been demonstrated in the current calculation rules. Three of them (points 26, 27 and 33 of the Regulation) are removed by the amendments in Section II of Material 1 (Table 1); the fourth, concerning families in difficult life circumstances, requires the developer’s decision and is set out in Section 7. In addition, points 37 and 44 of the Regulation do not expressly secure disclosure of all the elements required by Article 24 of the Law “On Personal Data” and Articles 53–54 of the Law “On Administrative Procedures”. Because the family’s financial condition remains a criterion from 1 January 2027,

the income calculation rules continue to determine the assessment result until replaced.

Table 1. Demonstrated inconsistencies in the current Regulation

Rule	Demonstrated result	Proposed correction
Point 27: household plot area $TEM = UM - QM - \min(0.2 UM; 200)$	Where buildings cover more than 80 % of a plot of up to 1,000 m ² , the area becomes negative. Example: $UM = 100$, $QM = 90$ gives -10 m ² and $-4,760$ soum of monthly normative income (minimum wage 1,360,000 soum, mahalla coefficient 1). A fully built-up 1,000 m ² plot gives -200 m ² and $-95,200$ soum per month. Negative income understates the family's income.	Section II, point 2: a negative result is taken as $TEM = 0$.
Point 32, subpoint "a" of point 33, subpoints "a" and "b" of point 39	Where average monthly income per member <i>equals</i> minimum consumption expenditure (715,000 soum in 2026), the refusal ground "higher than expenditure" does not apply and, absent other refusal grounds, the family is recognized under point 32; but categories "a" and "b" of point 39 and point 3 of Decree PF-258 require income <i>below</i> expenditure. A first-time applicant without a "mahalla seven" recommendation is assigned to no category.	Section II, point 3: the proposed prospective refusal at income <i>equal to</i> or higher than expenditure; the interpretation issue and alternatives are in Section 7.
Point 26: normative income for remittances	If the transfer is compared as a monthly average, for countries listed in Annex 6 a transfer of 2,719,999 soum is counted as 4,080,000 (three minimum wages), while 2,720,000 is counted as 2,720,000. A one-soum increase in the actual transfer reduces counted income by 1,360,000 soum. The comparison period (month or three months) and the comparison where several family members are abroad are not stated.	Section II, point 1: normative income applies where the monthly average transfer from a family member is below the normative income established for that member; counted income does not fall as the transfer rises. For transfers from Annex 6 countries between $2M$ and $3M$ per month, counted income rises to $3M$, as smaller transfers are already counted today.

Table 1. Demonstrated inconsistencies in the current Regulation

Rule	Demonstrated result	Proposed correction
Points 37 and 44	The published provisions require an SMS notice about inclusion, refusal, change of category or removal but do not expressly secure all the elements of explanation under Article 24, part three, of the Law “On Personal Data” and reasoning and appeal information under Articles 53–54 of the Law “On Administrative Procedures”. Actual messages were not examined.	Section II, points 4 and 5: specific factual and legal grounds, including the applicable provision, legal consequences, objection and rights-protection procedure, time limit and procedure for appeal through the personal account and Inson centres — on inclusion, refusal, change of category and removal.

All figures in the table are reproduced by the program in the electronic supplement; the method and full results are in Section 13 (39 automated checks pass; independent arithmetic control of 4,105 constructed cases of the area formula, of which 620 give a negative area). The calculations show the inconsistencies for the specified admissible inputs; they do not establish how the current software handles those inputs or how many families are affected — that is determined on the Agency’s data (Subsection 13.5).

1.1. Binding rules and technical implementation

The proposal concerns binding content in the already mandated act, rather than a separate act solely for testing. Paragraph 14 of Decree PF-193 requires a draft normative legal act but does not require adoption of all 23 author-proposed points. Article 20 of the Law “On Normative Legal Acts” requires consideration of existing mechanisms[1, 5]. Necessity is therefore assessed for each proposed duty, and test coverage and legal coverage are checked separately.

Material 1 provisions	What needs a legal decision	What may be implemented technically
Section I, points 3–10; Section II, points 1–3	Criteria, thresholds and equality, periods, exceptions and consequences of unconfirmed data, where applicable norms do not already determine them. A change to a published formula or entitlement condition is adopted by the competent authority.	Software implements the legally resolved meaning; field formats and input validation do not create an independent refusal ground.
Section I, points 17–19; Section II, points 4–5	A binding procedure for providing decision grounds and exercising existing explanation and appeal rights. Whether this is already fully established must be checked.	The record form, presentation through the existing personal account and archiving method.
Section I, points 2, 11–16, 20–22	If new binding conditions for applying a version and correction deadlines are adopted: the responsible actor, legal consequence of nonconformity, lawful continuity and review procedure.	The control-case inventory, protocol format and comparison workflow may be incorporated into existing commissioning procedures. Their detailed form does not itself require a separate new act.
Section I, point 23; Section III, point 5	Required budgetary, staffing and contractual decisions are taken within established competence. A resource assessment does not prove the necessity of every other point.	Cost only uncovered work after examining current contracts, controls and workload. Free provision of code does not imply free integration.
Section II, point 6; Section III, point 4; Section IV	The protected benefit date is a separate proposal concerning entitlement and the payment window; it needs its own justification and coordinated adoption of competent instruments.	Record original dates and verify conditions. Unresolved funding of this separate safeguard should not prevent priority consideration of assessment and explanation rules.

Limit of a technical remedy. Official interpretation addresses ambiguous application, but Article 55 prohibits corrections, amendments or additions under the guise of interpretation[5]. It follows that a test or programmer instruction cannot replace a competent amendment of a formula or a new general entitlement condition. Conversely, a counterexample is closed where an applicable lawful input restriction or proper interpretation is produced that actually excludes the case. A restriction solely in a software validator is not a sufficient legal ground to refuse a family. Existing cases are resolved with the favourable-interpretation rules in Section 7; arithmetic does not itself select a restrictive policy.

Legal form. For a departmental act, the features in points 94–95 of the Rules (registration No. 3686), including effects on rights and their safeguards, and the exceptions in point 96 are examined. Documents implementing an existing procedure without new legal norms and expressly listed technical documents are exempt from state registration on those grounds; the Ministry of Justice classifies other technical-regulation documents under subpoint “j” of point 96. The title “technical methodology” does not itself settle the question. Article 37 of the Law applies to a departmental normative legal act, and publication of a normative legal act is a mandatory condition of application under Article 38[6, 5]. This does not require registration of every test or contractual specification.

Checking existing coverage. For each row, identify the applicable legal provision, its actors, scope and application dates; then identify the software version, control cases and independently justified answers. Full legal coverage permits removal of duplication; full technical coverage permits reuse of the existing process. Neither is established solely by the other. The officials’ existing powers under point 46 and temporary measures for faults, interruptions and incomplete electronic data under point 48 of the Regulation are preserved[2]. The Agency’s own logs, tests and contracts have not been obtained for this project; their absence from these materials is not described as their absence at the Agency.

Acceptable drafting outcome. A shorter provision or reference to an already applicable norm is acceptable if it preserves the required competence, binding force, legal consequence, persons covered, application dates, access to decision grounds and lawful time limits. Adding technical examples alone does not replace an unresolved amendment of an entitlement condition. Additional deadlines and procedures in Section I remain proposals whose proportionality and resources are assessed separately; constructed cases do not establish the necessity of every deadline. The separate benefit-date safeguard cannot be used to prove that the entire verification regime is indispensable.

2. Author of the proposal

The proposal was prepared by citizen Abduxoliq Akmal ugli Ashuraliyev, independent researcher (ORCID 0009-0003-5482-5526). The official developers of the draft under paragraph 14 of Decree PF-193 are the Agency jointly with the Ministry of Economy and Finance. Article 23 of the Law “On Normative Legal Acts” requires the developer to study results of scientific research and appeals of individuals, and to generalize and use proposals of citizens and recommendations of scientists and specialists[5].

For participation in drafting, the author requests consideration for inclusion in the working group or commission under Article 22 and consents to inclusion for computational specification, control examples and their translation into legal provisions. The developer assesses knowledge and experience; appointment is not an automatic entitlement. The same materials may be used as scientific recommendations for drafting under Article 22[5].

3. Purposes, tasks and main provisions

The purpose is to ensure that each family's assessment result follows only from approved rules, can be reproduced from retained data and is explained to the applicant. The tasks are: remove uncertainty at threshold values; prevent the application of a methodology that conflicts with acts of higher legal force; check software before changes are applied; retain the grounds of each result; and eliminate the four demonstrated inconsistencies in the current Regulation.

Points of Material 1	Content	Justification
Section I, point 1	Terms: methodology, assessment result (including a change of category and removal following reassessment), calculation version, control example, control calculation, unconfirmed data	Methodology paragraph 8: repeatedly used terms are defined at the beginning. Reassessment is monthly; the category is changed automatically on its results (points 40–41 of the Regulation), and the family is removed from the Registry on its results (second and third paragraphs of point 42), for which point 44 expressly requires an SMS notice; so the protection of point 10 and the information under points 17–18 extend to these decisions.
Point 2	Responsibility of Information Technologies Centre staff for conformity of calculations to the methodology	Point 46 of the Regulation already makes the Centre's responsible staff responsible for correct operation of the YAMIH system; the norm defines the subject of that responsibility — conformity of calculations to the approved methodology.

Points of Material 1	Content	Justification
Points 3–7	For each criterion: source, unit, period, scoring, rounding, treatment of unconfirmed data, range of admissible values (area, quantity and income not negative; counted income does not decrease as actual income rises); category at equality; order of exceptions; calculation examples; date of application and the norm of the act establishing each threshold, interval and exception	Without these elements the same income is counted differently (Table 1; Subsection 13.3.4). Point 3(g) expressly prohibits in the new methodology both classes of error found in points 26 and 27 of the Regulation. Point 7(b) allows each threshold to be checked against the act that establishes it: an act must conform to acts of higher legal force (Article 18, part two, of the Law “On Normative Legal Acts”[5]). The current Regulation already contains a calculation example (point 30); Chile’s methodology states thresholds as “equal to or greater than” and gives a precedence rule when several checks apply[8].
Point 8	Software applies only established conditions	A new refusal ground is established by a normative act, not by a software setting.

Points of Material 1	Content	Justification
Points 9–10	Non-receipt is not absence of income; criterion marking, repeat request within one working day and applicant notice; no refusal, category change or removal solely because of unconfirmed data. Verification ends by the earlier of ten working days from the initial request and the applicable decision deadline, using point 3(f) if data remain unconfirmed; neither period restarts on a repeat request. Non-response does not itself suspend proceedings; lawful suspension and resumption require one-working-day notices. Reassessment results are not applied before completion; independent decision grounds are retained under point 17 and disclosed under point 18	Separates a technical failure from a fact (point 48 of the Regulation[2]). Articles 8 and 14 require the body to obtain interagency information[15]; Article 11 of the Law “On Personal Data” allows correction within three days[4]. The ten-working-day ceiling does not extend a shorter decision deadline: point 16 of the Regulation currently allows three working days for final assessment[2]. Articles 36–38 govern decision periods, lawful suspension and resumption; a missing interagency reply is not expressly a standalone suspension ground[15]. A decision still requires a statutory or methodology ground, including a prescribed default value. Established wrongful inclusion due to incomplete data remains subject to point 42; unconfirmed status alone is insufficient. Section II, point 6 protects the original consideration month and, for the boundary category, a single six-month window after a verified protected entry date. Section III, point 4 defines its prospective scope; Section IV supplies the corresponding Presidential amendment.

Points of Material 1	Content	Justification
Points 11–12	All mandatory control examples, including combinations of exceptions, unconfirmed-data cases, higher-ranking category boundaries and admissible-value limits; independent control calculations with a documented legal basis	A wrong score can produce the same category, so both are checked. The software being tested cannot supply its own expected answer. Article 18 requires conformity to higher-ranking acts and also favourable interpretation of contradictions and ambiguities arising between individuals and state bodies; Article 11 of the Law “On Administrative Procedures” applies to irreducible contradictions and ambiguities in administrative proceedings where interested persons do not disagree[5, 15]. Point 12 requires a legally resolved interpretation before the affected examples are approved; the arithmetic alone does not resolve that interpretation (Section 7).
Points 13–16	Comparison before first application and each relevant change; no differences and complete coverage of every requirement of point 11; protocol identifying the calculation version and the examples covering each requirement; lawful continuity arrangements established before launch for launch failure and later confirmed errors	The existing commissioning procedure records who checked what. Points 14 and 15(d) expressly cover the whole mandatory set, including unconfirmed data, exception combinations, higher-ranking boundaries and admissible-value limits; a gap blocks application. Identical facts must be treated alike (Article 15 of the Law “On Administrative Procedures”[15]). The competent authority establishes how applications and existing assistance are handled if launch conditions fail or a conflict is subsequently confirmed under point 20. A temporary algorithm change under point 22 remains subject to its own safeguards.

Points of Material 1	Content	Justification
Point 17	Information retained for the retention period of the result, including access to the methodology edition, parameters and executable software version, and the specific factual and legal grounds, including the applicable provision, for refusal, change of category or removal	A version number alone does not allow the calculation to be repeated; access to the rules, parameters and software themselves is therefore retained. Allows an objection to be answered on the merits and all decisions affected by an error to be found.
Points 18–19	Information to the applicant, including specific factual and legal grounds and the applicable provision, and the time limit and procedure for appeal; special data of other family members only as the fact a criterion applied	Article 24, part three, of the Law “On Personal Data”: explanation of the decision procedure, its legal consequences, objection and rights-protection procedure; Article 25: health and conviction data are special data[4]. Articles 53–54 of the Law “On Administrative Procedures”: all factual and legal grounds, time limit and procedure for appeal[15].
Points 20–21	Suspected conflicts recorded on discovery or receipt; verification within ten calendar days, with one reasoned extension of at most ten calendar days approved before expiry. Verification and review use the methodology and law applicable to the original assessment, with transitions. Confirmation triggers immediate notice to the Agency and competent decision-maker, a documented lawful measure under point 14, a responsible actor and correction deadline; the corrected version must pass points 13–15. Affected results are identified within ten calendar days and reviewed within one month	Covers software errors and faithful implementation of a methodology conflicting with applicable higher-ranking law. The Agency immediately prevents further affected decisions through an authorised continuity measure preserving lawful service; this grants no separate assessment system or override of higher-ranking law. The proposed verification periods require operational assessment. Point 42 of Annex 4 already assigns error correction[2]; equal treatment supports identifying all affected decisions (Article 15[15]). Neither verification, extension nor collective review extends complaint or notification deadlines. A recalculation difference does not itself establish cancellation or recovery grounds: the competent body applies statutory reliance safeguards and judicial consideration where required, including Article 59[15].

Points of Material 1	Content	Justification
Point 22	Recording of the temporary-algorithm decision, its grounds and period; check of results within ten days after restoration against the methodology applicable to the original assessment; review in the manner and within the period of point 21	A temporary algorithm change does not become a hidden permanent rule; a methodology change during an outage is not mistaken for an error.
Point 23	Financing and a documented resource assessment before first use	The Agency and Ministry of Economy and Finance must record the software, recordkeeping, control-example, explanation and review work, workload, staff and contract capacity, relevant appropriations and additional need, and obtain required funding, staffing and contract decisions before first use. Section 10.
Section II, points 1–5	Amendments to points 26, 27, 33, 37 and 44 of the Regulation	Table 1, Section 13 and Section 14.
Section II, point 6	Coordinated additions to Annex 3, points 10–13, 18, 23 and 26: reasoned confirmation of original Registry/category and benefit eligibility; protected entry date solely for benefit purposes, with actual technical dates retained separately; preserved consideration month; a fixed entitlement window of exactly six calendar months following the protected boundary-category entry month, with payment only from lawful commencement; initial-submission test, elapsed eligible-period payments and an express accrual cutoff	The date, six-month duration, refusal and termination rules must use the same legal basis. Delay, later payment or refiling cannot add a month or restart the window. Section IV coordinates Decree PF-258; Section III, points 4–5 defines scope and the pre-use resource duty.

Points of Material 1	Content	Justification
Section III, points 1–3	The amendments to points 26, 27 and 33 apply to applications considered after their entry into force; for families already included — for a “state-supported family” and a “poor family” from re-completion of the questionnaire (second paragraph of point 40), for a “family at the poverty boundary” from the end of the twelve-month period (fourth paragraph of point 42); until then a change of category or removal caused solely by the amendments is prohibited	The amendments may make some families ineligible (Section 10). The trust of persons acting in good faith in an administrative act is protected by law, and a change of practice must be general in character (Article 16 of the Law “On Administrative Procedures”[15]). The protection covers only the consequences of the amendments themselves: changes in the family’s composition, income and property are assessed in the ordinary way under the previous rules.
Section III, points 4–5; Section IV, point 1	The safeguard covers only initial benefit applications and any required linked Registry applications submitted on or after the later coordinated entry-into-force date. Earlier pending and concluded cases retain their applicable previous law and correction and appeal rights; refiling does not reset submission or the protected period. A separate pre-use resource assessment covers the payment safeguard. A Presidential act amends PF-258, point 5(v)(i)	Article 41 supplies the general rule against retroactive application; Articles 13 and 18 require conformity to Presidential acts. These provisions are separate from the income-rule transition in Section III, points 1–3[5].

4. Regulation at the level of law

The proposals relate to the subordinate act mandated by paragraph 14 of Decree PF-193. No draft law is proposed.

5. Expected results

1. No household-plot area calculation gives a negative value (at present this occurs where $QM > 0.8 UM$ for plots up to 1,000 m² and where $QM > UM - 200$ for plots over 1,000 m²).
2. For each threshold of the methodology the category at equality is determined; a family with income equal to minimum consumption expenditure receives a determinate result.
3. A family’s counted income does not fall when its actual remittance increases.

4. Each assessment result can be reproduced from retained data; a suspected conflict is recorded and verified within the proposed bounded period, and all affected decisions are identified within ten days after confirmation, including conflicts with applicable higher-ranking law. Confirmation also triggers an immediate lawful continuity measure preventing further decisions using the error; historical review uses the original applicable rules and their transitions, with statutory reliance safeguards.
5. On inclusion, refusal, change of category and removal, the applicant receives the grounds of the decision, information on its legal consequences, the objection and rights-protection procedure, and the time limit and procedure for appeal, as required by Article 24, part three, of the Law “On Personal Data” and Articles 53–54 of the Law “On Administrative Procedures”.
6. The new methodology and each change are applied only after every control-example requirement of point 11 is covered and scores and results match examples based on a legally resolved interpretation; a lawful continuity procedure is established before launch.
7. A missing reply from an information system does not in itself lead to refusal, change of category or removal of a family; verification stays within the applicable decision deadline and lawful suspension rules. Until a reassessment is completed its results are not applied. For the initial applications covered by Section III, point 4, a verified exclusively agency-side delay preserves lawful benefit commencement within a fixed entitlement window of exactly six calendar months following the protected boundary-category entry month, with payment only from that commencement and no restart or extra month (Section II, point 6; Section IV).

6. Foreign experience

Chile’s Ministry of Social Development and Family publishes the procedure for calculating the socio-economic rating of the Social Household Registry, approved by Resolution No. 082 of 15 November 2023, with worked calculation examples, thresholds stated as “equal to or greater than” and an explicit precedence rule when several checks are triggered for a household[8]. The World Bank notes that outdated registry data lead to both inclusion and exclusion errors, and that grievance redress mechanisms enhance transparency and accountability[9].

7. Description of content and a question for the developer’s decision

Section I of Material 1 (23 points) is included in the act being prepared. Section II (6 points) amends the Registry and benefit Regulations; Section III (5 points) separates the income-rule transition, the payment safeguard’s prospective scope and its resource assessment. Section IV (1 point) supplies the consequential amendment of Decree PF-258 for adoption by a Presidential act. If the implementing act

replaces the Regulations, the corresponding rules are included in its norms, with the Presidential amendment coordinated separately.

Question for the developer’s decision. For families in difficult life circumstances, subparagraph “v” of paragraph 3 of Decree PF-258, together with item (i) of note (b) to its Annex 1, sets the “family at the poverty boundary” interval from P to $1.5P$ on income reduced by 25 % [3]. Points 34–35 of the Regulation instead give $D > P$ and $A = 0.75D \leq 1.5P$, or $P < D \leq 2P$, with no lower bound on A . Under these stated readings the mismatch is $P < D < 4P/3$: $D = 858,000$ soum gives $A = 643,500 < P$. Point 39(v) does not specify reduced income; reading it as ordinary income would exclude $1.5P < D \leq 2P$, including $D = 1,287,000$ soum. After the proposed equality amendment, $D = P$ also enters the hardship procedure, extending the mismatch to $P \leq D < 4P/3$.

Existing cases and prospective amendments. Article 18, part six, of the Law “On Normative Legal Acts” requires legislative contradictions and ambiguities arising between individuals and state bodies to be interpreted in the individual’s favour. Article 11 of the Law “On Administrative Procedures” requires favourable interpretation of irreducible contradictions and ambiguities in administrative proceedings where the interested persons do not disagree [5, 15]. These provisions must be considered together with Article 18’s hierarchy rules when deciding existing equality and hardship cases. This note does not establish that favourable interpretation overrides every clear higher-ranking condition; equally, the arithmetic does not establish refusal or exclusion as the only lawful response. The competent body must explain how the applicable provisions resolve the particular case.

For future applications the developer may propose adding $A \geq P$ to points 34–35, or amend Decree PF-258 to retain the wider hardship interval. The restrictive option would exclude $P \leq D < 4P/3$ under the proposed equality rule and requires legal and policy justification, an assessment of affected families and transitional protection of existing recipients comparable to Section III, points 1–3 of Material 1. For equality $D = P$, the proposed refusal wording is one prospective option; a favourable inclusion route would require corresponding category provisions and, where necessary, amendment of the Decree. Under either hardship option, point 39(v) should expressly state that reduced income is used. Adoption of a clear prospective amendment is distinct from interpretation of an existing ambiguous rule; the amendment itself must comply with applicable law. Before control examples are approved, point 12 requires the applicable interpretation and its legal grounds to be resolved through the prescribed procedure and documented. Points 11(e) and 14 then check the software against that resolved legal basis.

8. Amendments to other acts

Section II amends points 26, 27, 33, 37 and 44 of the Registry Regulation (Annex 1 to Resolution No. 35) and supplements the benefit Regulation (Annex 3) at points 10, 11, 12, 13, 18, 23 and 26. Point 13 receives a ninth paragraph; point

23 receives a third paragraph (its existing “Bunda” rule is the second sentence of its second paragraph). Section IV amends point 5(v)(i) of Decree PF-258 by a Presidential act. Articles 13 and 18 of the Law “On Normative Legal Acts” require Cabinet acts to implement and conform to Presidential acts[5]; changing the category-entry basis for this benefit window therefore requires the corresponding Decree exception[3]. The proposed refusal amendment to point 33 does not itself change the Decree’s strict primary-category boundary. The equality and hardship alternatives in Section 7 remain separate.

Decision periods and the fixed benefit window. Articles 36–38 of the Law “On Administrative Procedures” govern decision periods and lawful suspension and resumption[15]. Annex 3, points 10–11 and 18 link consideration and payment months; point 13 sets six benefit months after entry into the boundary category; points 12, 23 and 26 also use category entry in refusal, unpaid-payment and termination rules[2]. Section II, point 6 aligns all these rules. A reasoned competent decision must establish the date on which category entry would lawfully have occurred without the exclusively agency-side delay, with original eligibility evidence. This protected date operates solely for the specified benefit purposes; actual entry and processing timestamps remain separately recorded. It does not change Registry reassessment or other state-support clocks. Payment cannot begin before the lawful commencement month under point 11, second paragraph. The window consists of exactly the six calendar months following the protected entry month. Later processing, payment, expiry detection or refiling cannot restart or extend it; accrual ends on the first day after the sixth month, subject to earlier lawful termination.

Prospective application. Under Section III, point 4, both the initial benefit application and any required linked Registry application must be submitted on or after the later entry-into-force date of the coordinated Presidential and implementing provisions. Article 41 states the general rule against retroactive application[5]. Earlier pending or concluded cases remain governed by their applicable previous rules and existing correction and appeal routes; they are not automatically reopened and refiling does not change the original submission date. No payment under the new exception covers a period before that coordinated date. Section III, points 1–3 continue to govern the income amendments separately.

One hypothetical worked example. Assume, solely for illustration, that the coordinated provisions take effect on 1 January 2027. An initial combined request is submitted on 5 January; all category and benefit conditions are met, and lawful entry and consideration would occur on 8 January. An exclusively agency-side delay causes actual entry on 8 February and a February decision. The proposed outcome is:

Case or date	Outcome under the proposed safeguard
Entry and consideration	Protected entry: 8 January; consideration month: January. Actual technical entry remains recorded as 8 February.
Benefit months and cutoff	February–July: six months. February is payable as an eligible elapsed month; March–July remain subject to monthly eligibility, amount rules and earlier lawful termination. Accrual ends on 1 August; August creates no entitlement under this window.
Decision only in September	Eligible February–July amounts are paid through the lawful procedure. September creates no new award or restart of this window.
Eligibility arises only in February	January cannot be protected: subsequent eligibility does not establish January entitlement.
Lawful consideration only in February; protected entry remains in January	The window remains February–July, with lawful payment commencing in March. February is not payable under that commencement rule; August is not added.
Initial request on 31 December 2026	Outside the safeguard’s illustrative prospective scope, even if processed in February or refiled after 1 January. Applicable previous rights and correction and appeal routes remain.
Initial request on 1 January 2027	Within the safeguard’s temporal scope if the other conditions are met; submission on the effective date is included.

The dates are assumed for this drafting example; they are not an observed family, an actual commencement date, a population estimate or an implemented production module. The attached program verifies income rules; this calendar example and the safeguard require separate administrative date and eligibility checks.

9. Justification of references

Points 19 and 21 of Section I refer to points 18, 20 and 22; point 20 refers to points 12, 14, 13–15 and 17; subpoints (d), (e) and (f) of point 10 refer to points 3, 17 and 18 and subpoint (e) of the same point; point 11(f) refers to point 3(g); point 12 refers to point 11(e); point 14 refers to points 11, 13 and 20; point 15(d) refers to point 11; and point 22 refers to point 21. These references avoid repeating the relevant text (Methodology paragraph 13). Point 13 refers to point 22 so that the comparison does not delay a temporary algorithm change during data-exchange failures. Point 15 refers to the established commissioning and change procedure without naming an act of potentially lower legal force (Methodology paragraph 11); the developer determines the adopting instrument. Section II identifies the amended act and its points (Methodology paragraph 69). Its point 5 refers to point

37, second paragraph, for the information disclosed and to point 42, fifth and sixth paragraphs, for the exceptions. Point 6 of Section II coordinates the benefit Regulation's new paragraphs at points 10–13, 18, 23 and 26: point 10 supplies the preserved consideration month and protected category-entry date; points 11, 13 and 18 align commencement and duration; points 12, 23 and 26 align initial submission, elapsed-period payments and the accrual cutoff. Section III, points 1–3 retain the income-rule transition; point 4 links prospective scope to the coordinated Presidential amendment in Section IV, and point 5 requires the payment safeguard's resource assessment. Section IV states the Decree exception itself, without relying on a lower-ranking Cabinet provision. Point 23 of Section I and point 5 of Section III define the corresponding pre-use resource duties.

10. Financial and economic justification

First document which duties are already covered by applicable norms, operational procedures and current contracts; then assess only uncovered work and workload. Where coverage is complete, additional development for that task is excluded; a gap records the particular task, responsible actor, contract coverage and resource source. Separating the benefit-date safeguard allows its fiscal question to be decided separately without using unproved expenditure to justify the other rules. This arrangement reduces duplication but is not a measurement of actual cost or confirmation of sufficient Agency capacity.

During preparation and submission of the government draft, the Agency and Ministry, as developers, must determine the need for implementation costs, the amounts and sources of their coverage under Article 23. Paragraph 84 of the Unified Methodology requires a brief financial and economic justification if implementation entails additional costs or budget losses, or corresponding information if neither arises[5]. The pre-use checks in Material 1, Section I, point 23 and Section III, point 5 supplement this duty; they do not replace or postpone it.

Material 1, Section I, point 23 and Section III, point 5 require the Agency, jointly with the Ministry of Economy and Finance, to document the relevant resource assessment and obtain required decisions before first use. The proposed approach uses YAMIH maintenance and development funds for the verification work and the relevant lawful appropriations for assistance payments:

1. No new bodies, posts, information systems or application stages are created; the existing YAMIH system, commissioning procedure, personal account on the Unified Portal of Interactive Public Services and Inson centres are used.
2. The set of control examples and the program calculating them have been prepared by the author and are provided free of charge with these materials.
3. Section I, point 23 requires an assessment on Agency records of software changes, reproducible recordkeeping, independent control examples, explanations and historical review, including workload, staff availability and existing contract capacity. The record must identify the appropriations, quan-

tify additional need and secure required funding, staffing and contract decisions before first use. This is a concrete drafting duty; the author has no Agency records from which to supply a reliable cost or capacity measurement.

4. Section III, point 5 extends that duty to Section II, point 6: preserving separate protected and actual dates, original eligibility evidence and payment records, assessing staff and software work, and costing amounts due within the fixed eligible window. Its prospective initial-application scope and six-month cutoff determine the assessment's payment scope. Paragraph 14 of Decree PF-258 establishes a budgeting duty[3]; it does not itself establish sufficient appropriations or contract capacity. The Agency and Ministry must identify the relevant appropriations, quantify additional need and obtain required funding, staffing and contract decisions before first use. The resource duty does not authorise postponement of statutory decision, complaint or payment deadlines.
5. Integration of the YAMIH system with the Tax Committee's information systems to obtain the land-tax coefficients approved for each mahalla, which are used to calculate normative income from a household plot, is provided for by measure 2 of item 6 of the roadmap (Annex 3 to Decree PF-258; implementers: the Tax Committee and the Agency)[3]. The amendment of point 27 adds only a zero floor to the formula and requires no new integration.
6. Under the literal readings used in the calculations, the proposed amendments to points 26, 27 and 33 do not reduce counted income and may make some families ineligible. The zero floor raises monthly counted income by at most $95,200k$ soum, where k is the mahalla coefficient. For Annex 6 transfers between $2M$ and $3M$, the remittance amendment raises counted income to $3M$: a family of four receiving only 2,720,000 soum monthly moves from 680,000 to 1,020,000 per person, crossing P . The equality amendment provides a refusal ground at $D = P$ for new applications, subject to applicable exceptions. These are conditional effects of the proposed wording, not a finding that present recipients must lawfully be excluded. Existing-case interpretation must address Article 18, part six, and Article 11 as explained in Section 7; choosing any prospective eligibility reduction requires its own justification and impact assessment.
7. Removing non-monotonicity does not itself require the higher normative income. A $2M$ normative income for Annex 6 countries is an alternative that may enlarge eligibility relative to the calculated readings and require additional expenditure. The Agency should compare the options using the legally resolved baseline, and justify any choice that reduces eligibility; neither the calculations nor a general budgeting duty selects that choice. The equality and hardship alternatives are set out in Section 7. Section III, points 1–3 protect families already included against category change or removal

caused solely by the amendments: until questionnaire re-completion for the primary categories (point 40, second paragraph) and the end of the twelve-month period for the boundary category (point 42, fourth paragraph).

The attached control calculations cover the income-rule groups only; the Agency must resolve the lawful baseline before using them for an impact assessment. The benefit safeguard requires separate review of initial submission, category-entry and consideration dates, original and monthly eligibility, termination and unpaid amounts within the protected window. No affected-family count, payment-cost estimate or measured operational capacity is supplied here. The proposed operative duties require those assessments from Agency records before first use.

11. Discussion and coordination

The proposal is submitted under Article 20 of the Law “On Normative Legal Acts” and Article 3 of the Law “On Appeals of Individuals and Legal Entities”. Discussion on the portal and coordination with interested bodies are conducted by the developer. Article 23 of the Law “On Normative Legal Acts” requires materials of the discussion of a draft to be submitted to the adopting body together with the draft; part 2 of Article 21 provides for placing information on the preparation of the most important socio-economic drafts on the portal, and Article 24 provides for placing the draft on the portal before it is submitted to the adopting body[5]. As of 1 October 2026, none of the 40 drafts placed on the discussion portal since 11 September 2026 is the draft under paragraph 14 of Decree PF-193[10].

12. Answers to possible objections

Objection	Answer
The current rules will be replaced from 2027	Financial condition remains a criterion (Decree PF-193, paragraph 13, subparagraph “a”). Until replacement the Regulation applies; on replacement the same corrections are included in the new norms. Section I concerns the new methodology itself.
Software is already tested	The existing commissioning procedure is used, but every requirement of point 11 must be covered: thresholds and adjacent values, exception combinations, unconfirmed-data types, methodology examples, higher-ranking income boundaries and admissible-value limits. Existing tests can be reused to the extent they provide that coverage.

Objection	Answer
Existing powers suffice (Article 20 of the Law “On Normative Legal Acts”)	New testing alone does not require a separate act. Subsection 1.1 separates binding decision conditions, existing rights and technical implementation. A new entitlement condition or amended formula needs a competent legal decision; an applicable norm or proper interpretation may close a specific gap without the proposed amendment. The PF-193 mandate does not establish the necessity of all 23 points.
All cases are already tested	Demonstrated coverage of applicable versions, thresholds, exceptions, periods and independently justified answers is accepted; no duplicate set is created. A test alone does not establish competence or the legally binding character of the rule it checks.
The author used an inadmissible value or an incorrect interpretation	An applicable norm or proper interpretation that excludes the case closes the corresponding finding. Legal and technical grounds for a restriction are distinguished; the author's nonreceipt of those grounds does not prove their absence.
A shorter provision suffices	An equivalent legal formulation with the same consequences and scope is accepted. Protocol formats and individual tests may remain in implementation documentation; an unresolved entitlement condition still needs a legal basis.
The benefit-date safeguard is not justified	This is a separate module needing assessment of original and monthly eligibility, the window, expenditure and competence. It should not condition consideration of the core methodology and explanation rules, and it does not establish the necessity of the entire verification regime.
The number of affected families is unknown	The income inconsistencies arise for the specified admissible inputs regardless of population frequency. The attached income-rule program supports the Agency's assessment of those groups. Payment-date cases require separate administrative date, eligibility and arrears review within Section III, point 4's scope; Section III, point 5 requires the relevant resource assessment before first use.
Costs	Section I, point 23 and Section III, point 5 impose a documented pre-use assessment of software, records, controls, explanations, review workload, staffing, contract capacity and payment expenditure, identification of appropriations and additional need, and required funding, staffing and contract decisions. PF-258 paragraph 14 is a budgeting duty, not evidence that the necessary capacity already exists. Section 10 identifies the assessment's scope.

Objection	Answer
The decision is taken by software, not by the body	A decision taken automatically remains a decision of the administrative body: it creates, changes or terminates public-law relations with the family (Article 4 of the Law “On Administrative Procedures”). Disputes on inclusion, category, reassessment and removal are resolved by the appeal councils (point 50 of the Regulation), which consider complaints under the legislation on administrative procedures (point 11 of Annex 4 to Resolution No. 35). Reasoning and the appeal procedure are mandatory (Articles 53–54)[15, 2].
A software check cannot block an approved methodology	Points 12 and 14 require a documented, legally resolved basis for control examples and complete coverage of point 11. Article 18’s hierarchy and later-act rules must be read together with its final favourable-interpretation rule and Article 11 of the Law “On Administrative Procedures”[5, 15]. The check detects an established legal or computational conflict; it does not decide an unresolved legal question by assuming exclusion. A later act of equal force is assessed under Article 18, including its stated exception, and is not treated as a lower-ranking act merely because it approves a methodology.
Point 14 may disrupt the transition from 1 January 2027	Comparison is required before the introduction date set by PF-193[1]. The supplied examples concern current income rules; the new multidimensional methodology needs its own complete set. Before first use, point 14 requires the competent approving authority to establish a lawful continuity procedure if launch conditions fail or a conflict is later confirmed under point 20: how applications and existing assistance are handled, the legal basis, responsible actors and correction time limits. It grants no authority to depart from higher-ranking law. Section I, point 23 requires a documented assessment and necessary resource decisions before first use; Section III, point 5 applies that duty to the payment safeguard. These duties make the required preparation operative, while the package supplies no measured capacity or working continuity-process evidence.
Disclosure of information	Only information about the applicant’s own family is disclosed; special personal data of other family members are shown only as the fact that a criterion applied (Article 25 of the Law “On Personal Data”); source code and security information are not disclosed.

13. Scientific and legal justification

This Section contains other information needed to justify the draft (Methodology paragraph 84): the research question, input data, method, results, their link to the proposed norms and the procedure for reproducing the calculations.

13.1. Research question and input data

The research question is stated so that it can be refuted: **do the published income and category rules give a single, internally consistent result at the thresholds and throughout the declared input domain?** The finding is refuted by an error in transcribing a rule, an omitted applicable exception, a narrower lawful input domain or a disagreement with independent arithmetic.

Official texts of the acts on lex.uz as of 30 September — 1 October 2026 were used: Decree PF-193, Resolution No. 35 (consolidated with the amendments made by Cabinet Resolutions No. 271 of 21 May 2026 and No. 393 of 20 July 2026), Decree PF-258, and the Laws “On Normative Legal Acts”, “On Personal Data”, “On Appeals of Individuals and Legal Entities”, “On Administrative Procedures” and “On Informatization”[1, 2, 3, 5, 4, 14, 15, 16]. Resolution No. 35 and Decree PF-193 are officially published in the state language; amendment wording follows the Uzbek text. The interpretation, reasoning, budgeting and launch provisions relevant to this revision were rechecked on LexUZ on 5 October 2026; the computational specification and case grids retain their original extraction vintage. Articles 36–38 and 59 of the Law “On Administrative Procedures”, point 16 of the Registry Regulation and points 10–13, 18, 23 and 26 of the benefit Regulation, point 5(v)(i) of Decree PF-258 and Articles 13, 18 and 41 of the Law “On Normative Legal Acts” were specifically rechecked on the current LexUZ texts on 6 October 2026 for the present procedural revision; computational inputs and case grids were unchanged, and no population estimates were introduced.

On 7 October 2026, Articles 20, 22, 23, 37, 38 and 55 of the Law “On Normative Legal Acts” and paragraph 84 of its Unified Methodology, points 94–96 of the Rules (registration No. 3686), paragraphs 13–14 of Decree PF-193, points 46 and 48 of the Regulation and Article 11 of the Law “On Administrative Procedures” were additionally checked on the current LexUZ texts to distinguish binding rules from technical implementation and verify the resource-assessment sequence[5, 6, 1, 2, 15]. This refines the legal justification; the original computational specification, grids and scope of quantitative findings remain unchanged.

Monthly minimum consumption expenditure per person in 2026 is $P = 715,000$ soum[12]; the minimum wage from 1 September 2026 is $M = 1,360,000$ soum[11].

13.2. Method

13.2.1. Objects and units

Let Y be the family's counted income over three months and N the counted number of members; monthly income per person is $D = Y/(3N)$ (point 18 of the Regulation). The formulas for individual income contributions and the category conditions are checked; full aggregation of Y from administrative data is not reproduced. The September 2026 value of M is used only in dated single-month calculations.

Calculations are performed by the reference program (electronic supplement). Numbers are entered as integers or strings of decimal and rational numbers; exact rational arithmetic is used, so equality comparisons are not distorted by binary rounding. Floating-point numbers, invalid divisors and incomplete data are rejected.

13.2.2. Prespecified plan and case selection

The list of checks and the case grids were fixed in the analysis plan before calculations were run. Income grid: P , $1.5P$, $2P$ with offsets of -1 , 0 , $+1$ soum. Difficult life circumstances: values around P , $4P/3$, $1.5P$, $2P$. Land formula: all integer building areas QM from 0 to UM for $UM = 100, 1,000, 1,001, 2,000$ m² (4,105 cases in total). Remittances: an unknown value and values around $2M$ for both country groups under two possible comparison periods. Tax base, self-employment and goats: prespecified points.

The grids are constructed domains, not a sample of families. The number of violating cases in a grid characterises the formula's domain, not the share of families in Uzbekistan; shares of families can be determined only on the Agency's data (Section 13.5).

13.2.3. Legal computational conditions

Subpoint "a" of point 33 refuses recognition as a "state-supported family" or "poor family" where $D > P$; point 32 recognizes the family where there is no refusal ground; subpoints "a" and "b" of point 39 and point 3 of Decree PF-258 assign families with $D < P$ to these categories[2, 3].

For difficult life circumstances $A = 3D/4$. Points 34–35 of the Regulation allow inclusion in the "family at the poverty boundary" category where $D > P$ and $A \leq 1.5P$. Subparagraph "v" of paragraph 3 of Decree PF-258, with item (i) of note (b) to Annex 1, sets for this procedure the interval from P to $1.5P$ on reduced income A ; subpoint "v" of point 39 of the Regulation repeats the interval without naming the type of income.

Household plot area (point 27): $TEM = UM - QM - \min(0.2 UM; 200)$ m² over the domain $0 \leq QM \leq UM$; monthly normative income $TEM \cdot 0.035 M \cdot k/100$, where 100 m² is one sotix and k the mahalla land-tax coefficient. The calculations take $k = 1$ because actual mahalla coefficients were not used; for another k the amounts are multiplied by k .

Remittances (point 26): if the amount of transfers is not determined or is less than $2M$, normative income cM applies, where $c = 3$ for countries listed in Annex 6 and $c = 2$ for other countries. Because the comparison period is not stated, both readings were calculated: comparison of a monthly amount q and of a three-month total.

13.2.4. Verification of results

Results were verified in four ways: reproduction of the official example in point 30; manual inequalities; a separate checking program that does not use the calculation module and recomputes all 4,105 land cases, 12 hardship cases, 24 tax cases, 16 remittance cases and 6 goat cases with integer expressions; and automated tests. All 39 tests pass (17 checks of the Regulation's rules, 12 checks of the synthetic scoring example and 10 provenance checks that reject an outdated, altered or incomplete result).

13.3. Results

13.3.1. Official example and equality to the threshold

The example in point 30 of the Regulation gives $6,480,000/(5 \cdot 3) = 432,000$ soum per person per month; the difference from the published answer is zero.

At $D = P = 715,000$ both conditions $D > P$ and $D < P$ are false. The refusal ground of subpoint “a” of point 33 does not apply and, absent other refusal grounds, the family is recognized under point 32, but it does not satisfy the condition of categories “a” and “b” of point 39. A first-time applicant without a “mahalla seven” recommendation is assigned to no category. The control case of a family previously removed from a primary category falls, at $D = P$, within the interval of subpoint “v” of point 39, confirming that the cases are correctly separated.

The proposed refusal amendment closes the literal gap by making the refusal condition the complement of $D < P$. It is a prospective choice; the present equality case must also be considered under the favourable-interpretation provisions, and a prospective inclusion alternative requires corresponding category amendments (Section 7).

13.3.2. Difficult life circumstances: the Regulation is wider than the Decree

The conditions of the special procedure simplify exactly:

$$D > P, \quad \frac{3}{4}D \leq \frac{3}{2}P \quad \Longleftrightarrow \quad P < D \leq 2P. \quad (1)$$

Under the Decree the interval applies to reduced income: the condition $A \geq P$ is equivalent to $D \geq 4P/3$. The Regulation additionally includes families with $P < D < 4P/3$; example: $D = 858,000$ soum ($1.2P$), reduced income $643,500 < P$. Subpoint “v” of point 39 of the Regulation does not name the type of income; applied to ordinary income it would exclude families with $1.5P < D \leq 2P$; example:

$D = 1,287,000$ soum ($1.8P$) (Figure 1). At $P = 715,000$: $4P/3 = 2,860,000/3$, $1.5P = 1,072,500$, $2P = 1,430,000$ soum.

Figure 1. Income normalised by P . A filled endpoint is included, an open one excluded. Top line: income conditions of points 34–35 of the Regulation; bottom line: the Decree PF-258 interval on reduced income; middle line: the interval on ordinary income, intersected with points 34–35. The special procedure also requires the relevant circumstances, a recommendation and compliance with the quota.

13.3.3. Negative area in the land formula

For $UM \leq 1,000$ the formula equals $TEM = 0.8 UM - QM$ and is negative exactly when $QM > 0.8 UM$; for $UM > 1,000$ it equals $TEM = UM - QM - 200$, negative when $QM > UM - 200$. The smallest value over $0 \leq QM \leq UM$ is $-\min(0.2 UM; 200)$ m². Enumeration of 4,105 integer cases confirms the inequalities: 620 cases give a negative area (Table 2, Figure 2).

Plot UM (m ²)	Integer test cases	Negative cases	Minimum TEM (m ²)	Maximum floor change (soum/month)
100	101	20	-20	9,520
1,000	1,001	200	-200	95,200
1,001	1,002	200	-200	95,200
2,000	2,001	200	-200	95,200
Total constructed grid	4,105	620	—	—

Table 2. Calculation at $M = 1,360,000$ and $k = 1$. Counts refer to the constructed grid. The last column is the largest change in the family’s monthly normative income when the zero floor is introduced.

Example: $UM = 100$, $QM = 90$ gives $TEM = -10$ m² and $-4,760$ soum of monthly normative income; a fully built-up 1,000 m² plot gives -200 m² and $-95,200$ soum. The negative contribution reduces the family’s counted income, although an area cannot physically be negative. The proposed zero floor gives $TEM = 0$ and does not change the result where $TEM \geq 0$.

Figure 2. Solid line: current formula; dashed line: with the zero floor; for each UM all integer QM from 0 to UM are considered.

13.3.4. Remittances: counted income falls as the transfer rises

Equality $q = 2M$ does not satisfy “less than $2M$ ”. Under the monthly reading, for countries in Annex 6 counted income falls from $3M$ just below the threshold to $2M$ at the threshold: a transfer of 2,719,999 soum is counted as 4,080,000, a transfer of 2,720,000 as 2,720,000. A one-soum rise in the transfer reduces counted income by 1,360,000 soum. For other countries the monthly reading is continuous. Under the three-month-total reading, jumps arise for both groups (Table 3, Figure 3).

Conditional period	Country group	Monthly contribution drop (soum)	Per-person drop, four members (soum)
Monthly	Listed countries	1,360,000	340,000
Monthly	Other countries	0	0
Three-month total	Listed countries	9,520,000/3	2,380,000/3
Three-month total	Other countries	5,440,000/3	1,360,000/3

Table 3. Fall in counted monthly income at the threshold, soum. Rows correspond to the two possible readings of the rule.

Figure 3. Horizontal axis: q/M ; vertical axis: counted monthly income relative to M . Solid horizontal segments: countries in Annex 6; dashed: other countries; vertical line: threshold.

The proposed wording (Material 1, Section II, point 1) applies normative income where the monthly average of transfers from a family member working or carrying on entrepreneurial or other activity abroad is below the normative income established for that member. Counted income equals $\max(q; cM)$ and does not decrease as q rises; this is checked by an automated test on a 1,000-soum grid for both country groups. For other countries ($c = 2$) the result coincides with the current monthly reading. Under both readings of the current rule, the proposed wording reduces no family's counted income. For families with transfers from Annex 6 countries between $2M$ and $3M$ per month, counted income rises to $3M$, and some such families may lose eligibility; the alternative way of removing the non-monotonicity and its consequences are set out in Section 10.

13.3.5. Self-employment coefficients, tax base and livestock

Point 23 sets eight coefficients of monthly normative income for the self-employed: four territory types and two sexes. The difference between the male and female coefficient in each territory equals $0.4M = 544,000$ soum per month (Table 4). The calculation reflects normative income, not actual earnings.

Geographic class	Male base	Female base	Informal male	Informal female
Tashkent	3,672,000	3,128,000	3,855,600	3,284,400
Nukus / regional centres	3,264,000	2,720,000	3,427,200	2,856,000
Other cities	2,856,000	2,312,000	2,998,800	2,427,600
Other units	2,448,000	1,904,000	2,570,400	1,999,200

Table 4. Monthly normative contributions at $M = 1,360,000$; the informal contribution multiplies the base by 1.05 under the conditions of point 25.

Under point 24 the tax base equals the minimum at a three-month tax of $T = 6B_0/5$; below it B_0 applies, above it the base rises with slope $5/6$. The rule is

continuous and monotone; all 24 cases agree with the piecewise expression. Under point 28, 14 goats give zero ($14 \cdot 0.07 = 0.98$ equivalent head), 15 give 34,000 soum per month, 20 give 272,000 and 100 give 4,080,000. The Regulation sets no rounding rule for fractional equivalent heads; the methodology must determine it (Material 1, Section I, point 3).

13.3.6. *Specification questions*

The calendar offset of the three-month period in point 18 is confirmed by the example in point 30 (application in September — income for May–July) and should be recorded in the methodology as a rule. Foreign currency is converted at the rate on the date YAMIH receives the information (point 19); this date must be retained with the result so the calculation can be reproduced (Material 1, Section I, point 17).

13.4. From results to the proposed norms

Result	Proposed norm (Material 1)
Equality to the threshold undetermined (13.3.1)	Section II, point 3; Section I, points 4 and 6 — category at equality and examples in the new methodology.
Regulation wider than Decree PF-258 under the stated hardship readings (13.3.2)	Developer's decision and favourable interpretation (Section 7); Section I, points 5, 7(b), 11(e), 12 and 14 — a single result and control examples with a legally resolved basis before application.
Negative area (13.3.3)	Section II, point 2; Section I, point 3(g) — negative area, quantity and income prohibited; point 11(f) — control examples at the boundaries of admissible values.
Non-monotonicity and undefined period for remittances (13.3.4)	Section II, point 1; Section I, point 3 — source, unit and period of each criterion; point 3(g) — counted income does not decrease as actual income rises.
Rounding and exchange rate (13.3.5, 13.3.6)	Section I, points 3 and 17.
Published notification provisions do not expressly secure all decision grounds (Section 1)	Section II, points 4 and 5; Section I, points 17–21.
Hypothetical calendar example and proposed timing safeguards (Section 8)	Section II, point 6; Section III, points 4–5; Section IV — protected benefit-purpose entry date, exactly six following calendar months, coordinated refusal/arrears/termination rules, prospective initial-application scope and a pre-use resource assessment.

The errors were found at thresholds, in exceptions and in units. That is why point 11 requires threshold and adjacent-value cases together with exception

combinations, unconfirmed-data types, methodology examples, higher-ranking income boundaries and admissible-value limits. Passing a finite set does not prove the absence of every error. Points 14 and 15(d) require coverage of every requirement of point 11, while point 12 requires a documented legal basis for the expected answers.

13.5. Application to the Agency's data

The inconsistencies arise for the specified admissible inputs regardless of their frequency; the calculations do not establish how the current software handles those inputs or how many families are affected. The supplied reference calculations can be reused in an Agency-approved assessment of the following groups:

1. plots with $QM > 0.8 UM$ (where $UM \leq 1,000 \text{ m}^2$) or $QM > UM - 200$ (where $UM > 1,000 \text{ m}^2$) — affected by the correction of point 27;
2. families with $D = P$ — affected by the correction of subpoint “a” of point 33;
3. families whose counted income differs between the current and the proposed rule: under the monthly reading, transfers from Annex 6 countries between $2M$ and $3M$ per month; under the three-month-total reading, also transfers from any country with a monthly average between $2M/3$ and $2M$ — affected by the correction of point 26;
4. families included under point 35 with $P < D < 4P/3$ (reduced income below P) — affected by the question in Subsection 13.3.2.

An Agency-approved workflow for data extraction and linkage, resolution of the lawful baseline, and complete household-income and eligibility calculation is required before affected-family counts or policy effects can be assessed. No adapter for an Agency cohort is supplied. The proposed assessment should be performed inside the Agency by an authorized operator; only aggregate numbers leave the Agency.

13.6. Conclusions

1. The published calculation rules are reproducible: the official example gives 432,000 soum with no difference.
2. Inconsistencies are demonstrated in four rules: an undetermined result at income equal to P ; under the stated readings, a wider hardship interval in the Regulation than in Decree PF-258; a negative area where buildings cover more than 80 % of a plot of up to $1,000 \text{ m}^2$ (for larger plots, where $QM > UM - 200$); and a fall in counted income as a transfer rises.
3. The proposed amendments remove the textual inconsistencies prospectively; individual equality and hardship cases require a legally reasoned interpretation, and any restrictive remedy requires justification (Section 7). A software setting cannot settle these legal choices.
4. For the new methodology, Section I of Material 1 requires a determinate equality result, an order for exceptions, admissible values, and legally re-

solved control examples (points 3(g), 4, 5, 7(b), 11 and 12). Point 14 requires complete coverage of point 11 and no score or result differences before application, with a lawful continuity procedure established before launch; specific factual and legal grounds are retained and disclosed (points 17–18), and suspected conflicts are subject to bounded verification (point 20).

5. For initial applications within Section III, point 4’s prospective scope, the coordinated benefit safeguard preserves the verified original date and a fixed entitlement window of exactly six calendar months following the protected boundary-category entry month, with payment only from lawful commencement. No later processing, payment or refiling adds a month or restarts the window. The Presidential amendment and the implementing rules must be in force together; Sections I, point 23 and III, point 5 require documented resource preparation before first use.

13.7. Reproduction

The electronic supplement contains the analysis plan, a dated extraction of the rules (data/rules/legal_specification.json), control cases, the program (src/social_registry/), tests (tests/), the independent check and results (results/). No network access is needed; no random numbers are used. Each result stores SHA-256 hashes of the specification and code, the command and the run time; the checking program rejects a result if the code or inputs have changed.

The output of the 39 recorded tests is retained in results/logs/tests.log; commands and exit statuses are recorded in results/logs/run_manifest.json, and document-source and PDF hashes in results/logs/document_build_manifest.json. Those tests cover the maintained income-rule, synthetic-score and provenance checks. They do not validate the proposed payment/calendar safeguards or certify translation quality.

python scripts/run_analysis.py --self-test
python scripts/run_analysis.py --legal-audit
python scripts/verify_results.py
python scripts/run_project.py
```

14. Comparison table

Both Regulations are officially published in the state language; therefore the current and proposed wording is given in Uzbek, with a translation of the changed words in the justification column. Changed words of the current wording are italic and underlined; new words are bold (Methodology paragraph 85).

Current wording	Proposed wording	Justification
26-band, birinchi xatboshi: «...pul o'tkazmalari miqdori aniqlanmasa yoki <u>o'tkazmalar miqdori mehnatga haq to'lash eng kam miqdorining ikki baravari miqdoridan</u> kam bo'lsa, u holda ... quyidagicha normativ daromad qo'llaniladi:»	«...pul o'tkazmalari miqdori aniqlanmasa yoki chet elda ishlaydigan yoki chet elda tadbirkorlik va boshqa faoliyatni amalga oshiruvchi oila a'zosidan kelgan o'tkazmalarning bir oylik o'rtacha miqdori ushbu bandda unga nisbatan belgilangan normativ daromaddan kam bo'lsa, u holda ... quyidagicha normativ daromad qo'llaniladi:»	“less than twice the minimum wage” becomes “monthly average from a family member working or doing business abroad less than the normative income established for that member”. Removes the fall in counted income when a transfer increases, the unspecified comparison period and the comparison where several members are abroad (Table 1).
27-band: « $TEM = UM - QM - (UM \times 20\%) \dots (UM \times 20\%)$ ko'rsatkichi 200 metr kvadratdan oshmagan holda hisob-kitob uchun qabul qilinadi.»	Oltinchi xatboshidan keyin quyidagi xatboshi bilan to'ldirilmoqda: « Formula bo'yicha aniqlangan TEM qiymati manfiy bo'lsa, TEM nolga teng deb qabul qilinadi. »	New paragraph: “If the TEM value is negative, TEM is taken as zero.” Excludes negative area and negative normative income (Table 1).
33-band «a» kichik bandi: «...bir oylik jami o'rtacha daromadi minimal iste'mol xarajatlari miqdoridan yuqori bo'lganda.»	«...bir oylik jami o'rtacha daromadi minimal iste'mol xarajatlari miqdoriga teng yoki undan yuqori bo'lganda.»	“higher than expenditure” becomes “equal to or higher than expenditure”. A family with income equal to expenditure receives a determinate result consistent with PF-258 point 3 (Table 1).

Current wording	Proposed wording	Justification
37-band: «Oilaning Reyestrğa kiritilganligi yoki Reyestrğa kiritish rad etilganligi haqida ariza beruvchining mobil telefon raqamiga SMS-xabar yuboriladi.»	Quyidagi ikkinchi xatboshi bilan to'ldirilmoqda: «Bir vaqtning o'zida ariza beruvchiga Yagona interaktiv davlat xizmatlari portalidagi shaxsiy kabinet orqali, uning murojaatiga ko'ra esa "Inson" ijtimoiy xizmatlar markazida qaror qabul qilinishiga asos bo'lgan ma'lumotlar, qarorning aniq haqiqiy va yuridik asoslari, shu jumladan normativ-huquqiy hujjatning qo'llanilgan normasi, qo'llanilgan normativ daromadlar, qaror qabul qilish tartibi, qarorning ehtimoldagi yuridik oqibatlari, unga e'tiroz bildirish va o'z huquqlarini himoya qilish tartibi, qaror ustidan shikoyat qilish muddati va tartibi to'g'risidagi ma'lumotlar taqdim etiladi. Boshqa oila a'zolarining shaxsga doir maxsus ma'lumotlari faqat tegishli mezon qo'llanilganligi fakti sifatida ko'rsatiladi.»	New paragraph: specific factual and legal grounds, including the applicable provision, underlying data, normative incomes applied, decision procedure, its legal consequences, objection and rights-protection procedure, time limit and procedure for appeal; special data of other family members only as the fact that a criterion applied. Implements Article 24, part three, and Article 25 of the Law on Personal Data and Articles 53–54 of the Law on Administrative Procedures.

Current wording	Proposed wording	Justification
44-band: «Oilaning toifasi o'zgarganligi yoki Reyestrda chiqarilganligi haqida ariza beruvchining mobil telefon raqamiga SMS-xabar yuboriladi.»	Quyidagi ikkinchi xatboshi bilan to'ldirilmoqda: «Bunda ariza beruvchiga mazkur Nizomning 37-bandi ikkinchi xatboshisida nazarda tutilgan ma'lumotlar taqdim etiladi, mazkur Nizom 42-bandining beshinchi va oltinchi xatboshilarida nazarda tutilgan hollar bundan mustasno.»	New paragraph: "In this case the applicant shall be provided with the information provided for in the second paragraph of point 37, except in the cases provided for in the fifth and sixth paragraphs of point 42." The same information on a change of category and on removal from the Registry, except where all family members have died or the family is removed at its own request (fifth and sixth paragraphs of point 42).
3-ilova, 10-band: «Oyning 16-sanasiga qadar taqdim etilgan arizalar murojaat qilingan oyda, 16-sanada va undan keyin taqdim etilgan murojaatlar keyingi oyda ko'rib chiqiladi. Reyestrda kiritilmagan oila a'zosi tomonidan oyning 16-sanasiga qadar taqdim etilgan arizalar bo'yicha oila keyingi oyda Reyestrda kiritilgan taqdirda bolalar nafaqasi yoki moddiy yordam tayinlash to'g'risidagi murojaat ham keyingi oyda ko'rib chiqiladi.»	Quyidagi uchinchi xatboshi bilan to'ldirilmoqda: «Reyestrda kiritish yoki arizani ko'rib chiqish faqat idoralararo ma'lumotlarning kechikishi yoki vakolatli organlar axborot tizimlaridagi nosozlik sababli kechiktirilgan bo'lsa va keyingi tekshiruv oila bunday kechikishsiz ariza qonuniy hal etilishi lozim bo'lgan paytda Reyestrda kiritish hamda yordam tayinlashning qo'llaniladigan shartlariga mos kelganligini aniqlasa, yordamning boshlanishini belgilash uchun ariza ushbu bandga muvofiq bunday kechikishsiz ko'rib chiqilishi lozim bo'lgan oy olinadi.	New third paragraph: preserves the lawful consideration month only after proof of original eligibility and exclusively agency-side delay; records the protected category-entry date, actual technical date and single window separately.

Current wording	Proposed wording	Justification
3-ilova, 10-band (davomi)	Vakolatli organ arizaning dastlabki sanasini, tartib-taomil bosqichlarining qo‘llaniladigan sanalarini, kechikish sababini va tegishli paytda yordam olish huquqi mavjudligining dalillarini, “kambag‘allik chegarasidagi oila” toifasidagi oila uchun esa mazkur Nizom 13-bandining to‘qqizinchi xatboshisiga muvofiq belgilangan toifaga kiritishning himoyalangan sanasini, toifaga amalda texnik kiritilgan sanani va ushbu xatboshidagi yagona olti oylik davrni hujjatlashtiradi. Yordam olish huquqi tegishli qonuniy paytdan keyin birinchi marta yuzaga kelgan bo‘lsa, u avvalgi sanaga tatbiq etilmaydi.”.	Continuation of the same proposed paragraph.

Current wording	Proposed wording	Justification
3-ilova, 11-band: «Bolalar nafaqasi yoki moddiy yordam uni tayinlashni rad etish uchun asoslar aniqlanmaganda ariza ko‘rib chiqilgan oydan keyingi oydan “Yagona reyestr” ATda avtomatik tarzda tayinlanadi va to‘lanadi.»	Quyidagi ikkinchi xatboshi bilan to‘ldirilmoqda: “Mazkur Nizom 10-bandining uchinchi xatboshisida nazarda tutilgan hollarda bolalar nafaqasi yoki moddiy yordam ushbu xatboshiga muvofiq belgilangan oydan keyingi oydan tayinlanadi va to‘lanadi. Oila yordam olish huquqiga ega bo‘lgan o‘tgan oylar uchun tegishli summalar to‘lovning belgilangan tartibida hisoblanadi va to‘lanadi; “kambag‘allik chegarasidagi oila” toifasidagi oila uchun ushbu oylar mazkur Nizom 13-bandining to‘qqizinchi xatboshisiga muvofiq belgilangan olti oylik davr bilan cheklanadi. Bir oy uchun avval to‘langan summa takroran to‘lanmaydi.”.	New second paragraph: lawful commencement follows the preserved consideration month. Eligible arrears for the boundary category remain inside the fixed six-month window; an already paid month is not paid twice.

Current wording	Proposed wording	Justification
3-ilova, 12-band, uchinchi xatboshi: «ariza taqdim etilgan sanada oila Reyestrda “kambag‘allik chegarasidagi oila” toifasiga o‘tkazilganiga (kiritilganiga) olti oy to‘lgan bo‘lsa;»	Quyidagi beshinchi xatboshi bilan to‘ldirilmoqda: “Mazkur Nizom 10-bandining uchinchi xatboshisi “kambag‘allik chegarasidagi oila” toifasidagi oilaga qo‘llanilganda, ushbu banddagi olti oylik rad etish sharti yordam tayinlash haqidagi ariza dastlab birinchi marta taqdim etilgan sanada, mazkur Nizom 13-bandining to‘qqizinchi xatboshisiga muvofiq belgilangan toifaga kiritishning himoyalangan sanasidan foydalanib tekshiriladi. Ushbu maqsadda keyingi ko‘rib chiqish, qayta hisoblash yoki takroran yoxud qaytadan taqdim etilgan ariza dastlabki taqdim etish sanasini almashtirmaydi.	New fifth paragraph: tests the refusal condition at the original initial submission using the protected entry date. Later processing or refiling cannot replace that date; other lawful refusal grounds remain.
3-ilova, 12-band (davomi)	Mazkur Nizom 11-bandining ikkinchi xatboshisiga muvofiq yordam olish huquqi mavjud bo‘lgan o‘tgan oy uchun aniqlangan talab faqat ko‘rib chiqish keyinroq yakunlanganligi sababli rad etilmaydi. Rad etishning boshqa qonuniy asoslari qo‘llanilishi saqlanadi.”.	Continuation of the same proposed paragraph.

Current wording	Proposed wording	Justification
3-ilova, 13-band, birinchi xatboshi: «Bolalar nafaqasi va moddiy yordam “davlat ta’minotidagi oila” va “kambag‘al oila” toifasidagi oilalarga ular mazkur toifadan chiqquniga qadar, “kambag‘allik chegarasidagi oila” toifasidagi oilalarga ular mazkur toifaga o‘tkazilgan (kiritilgan) oydan keyingi olti oy muddat uchun tayinlanadi. Bunda:»	Quyidagi to‘qqizinchi xatboshi bilan to‘ldirilmoqda: “Mazkur Nizom 10-bandining uchinchi xatboshisi qo‘llaniladigan “kambag‘allik chegarasidagi oila” toifasidagi oila uchun vakolatli organ toifaga kiritish va yordam olishning dastlabki shartlari tegishli qonuniy paytda bajarilganligi dalillariga asoslangan asoslantirilgan qaror bilan, faqat yordam maqsadlari uchun, toifaga kiritishning himoyalangan sanasini kechikishsiz ushbu toifaga qonuniy kiritilishi lozim bo‘lgan sana sifatida belgilaydi. Toifaga amalda texnik kiritilgan sana alohida saqlanadi. Himoyalangan sana Reyestrda qayta baholash yoki davlat ijtimoiy qo‘llab-quvvatlashning boshqa choralari muddatlarini qaytadan boshlamaydi va boshqacha tarzda o‘zgartirmaydi.	New ninth paragraph: a reasoned decision fixes the benefit-only protected entry date. The six following calendar months form one window; other support and reassessment clocks remain intact. Payment begins no earlier than lawful commencement, subject to eligibility and earlier termination.

Current wording	Proposed wording	Justification
3-ilova, 13-band (davomi)	Yordam olish huquqi toifaga kiritishning himoyalangan sanasi tegishli bo‘lgan oydan keyingi olti kalendar oy bilan cheklanadi. Ko‘rib chiqish, amalda kiritish yoki to‘lovning kechikishi ushbu davrni qaytadan boshlamaydi va uzaytirmaydi. Summalar mazkur Nizom 11-bandining ikkinchi xatboshisiga muvofiq belgilangan yordam boshlanadigan oydan oldin bo‘lmagan, faqat shu davr ichidagi yordam olish huquqi mavjud bo‘lgan oylar uchun to‘lanishi lozim; muddatidan oldin to‘xtatishning boshqa qonuniy asoslari qo‘llanilishi saqlanadi.”.	Continuation of the same proposed paragraph.
3-ilova, 18-band: «Bolalar nafaqasi va moddiy yordam mazkur Nizomning 10-bandiga muvofiq ariza ko‘rib chiqilgan oydan keyingi oyning birinchi sanasidan to‘lanadi.»	Quyidagi ikkinchi xatboshi bilan to‘ldirilmoqda: “Mazkur Nizom 10-bandining uchinchi xatboshisida nazarda tutilgan hollarda to‘lov ushbu xatboshiga muvofiq belgilangan oydan keyingi oyning birinchi sanasidan, mazkur Nizom 11-bandining ikkinchi xatboshisiga muvofiq yordam olish huquqi mavjud bo‘lgan o‘tgan oylar uchun tegishli summalarni ham qamrab olgan holda boshlanadi. “Kambag‘allik chegarasidagi oila” toifasidagi oila uchun to‘lov mazkur Nizom 13-bandining to‘qqizinchi xatboshisiga muvofiq belgilangan olti oylik davr ichidagi yordam olish huquqi mavjud bo‘lgan oylar bilan cheklanadi.”.	New second paragraph: payment starts on the first day following the preserved consideration month. Boundary-category payment and eligible arrears remain within the same six-month window.

Current wording	Proposed wording	Justification
3-ilova, 23-band, ikkinchi xatboshi: «Respublika budgetida nazarda tutilgan mablag‘lar hajmidan kelib chiqib, Reyestruga kiritilgan oilaga bolalar nafaqasi yoki moddiy yordam to‘lash imkoniyati bo‘lmagan taqdirda, unga bolalar nafaqasi yoki moddiy yordam to‘lash masalasi avtomatik ravishda keyingi oyda qayta ko‘rib chiqish uchun o‘tkaziladi. Bunda keyingi oyda oila Reyestrudan chiqarilganda yoki “kambag‘allik chegarasidagi oila” toifasiga o‘tkazilganiga olti oy to‘lganda, mazkur oilaga faqat oldingi oylar uchun to‘lanmay qolgan bolalar nafaqasi yoki moddiy yordam to‘lab beriladi.»	Quyidagi uchinchi xatboshi bilan to‘ldirilmoqda: “Mazkur Nizom 10-bandining uchinchi xatboshisida nazarda tutilgan hollarda ushbu bandga muvofiq budget bilan bog‘liq sababga ko‘ra to‘lovni kechiktirish “kambag‘allik chegarasidagi oila” toifasidagi oila uchun yordam olish huquqi mavjud bo‘lgan qo‘shimcha oyni yuzaga keltirmaydi yoki olti oylik davrni qaytadan boshlamaydi. Ushbu davr tugaganidan keyin mazkur Nizom 11-bandining ikkinchi xatboshisiga muvofiq to‘lanmagan summalar faqat mazkur Nizom 13-bandining to‘qqizinchi xatboshisiga muvofiq belgilangan davr ichidagi yordam olish huquqi mavjud bo‘lgan oylar uchun to‘lanishi mumkin.”	New third paragraph: budget-related postponement creates neither a new eligible month nor a restart. Later arrears cover only eligible months within the window. The existing “Bunda” sentence belongs to the second paragraph.

Current wording	Proposed wording	Justification
3-ilova, 26-band, birinchi xatboshi: «Bolalar nafaqasi yoki moddiy yordamni to‘lash quyidagi hollarda mazkur holatlar aniqlangan oydan keyingi oydan boshlab to‘xtatiladi:» “a” kichik bandi: «a) oila Reyestrda chiqarilganda yoki “kambag‘allik chegarasidagi oila” toifasiga o‘tkazilganiga (kiritilganiga) olti oy to‘lganda;»	Quyidagi yakuniy xatboshi bilan to‘ldirilmoqda: “Ushbu bandning birinchi xatboshisidagi holatlar aniqlangan oydan keyingi oydan boshlab to‘xtatish qoidasidan qat’i nazar, mazkur Nizom 10-bandining uchinchi xatboshisi qo‘llaniladigan “kambag‘allik chegarasidagi oila” toifasidagi oilaning yordam olish huquqi aniqlash, amalda texnik kiritish, ko‘rib chiqish yoki to‘lov sanalaridan qat’i nazar, mazkur Nizom 13-bandining to‘qqizinchi xatboshisiga muvofiq belgilangan toifaga kiritishning himoyalangan sanasi tegishli bo‘lgan oydan keyingi oltinchi kalendar oydan keyin keladigan oyning birinchi sanasidan tugaydi.	New final paragraph expressly overrides the detection-month rule: accrual ends on the first day after the sixth month following protected entry. Late detection creates no further month; eligible arrears and other earlier termination grounds remain.
3-ilova, 26-band (davomi)	Davrning tugashi mazkur Nizom 11-bandining ikkinchi xatboshisiga muvofiq shu davr ichidagi yordam olish huquqi mavjud bo‘lgan oldingi oylar uchun to‘lanmagan summalarni to‘lashga to‘sqinlik qilmaydi. Muddatidan oldin to‘xtatishning boshqa qonuniy asoslari qo‘llanilishi saqlanadi.”.	Continuation of the same proposed paragraph.

Current wording	Proposed wording	Justification
PF-258-son Farmon, 5-band, “v” kichik bandining (i) bandi[3]: «(i) bolalar nafaqasi yoki moddiy yordam oilalar mazkur toifaga kiritilgan vaqtdan e’tiboran 6 oy davomida to’lanadi;»	Quyidagi xatboshi bilan to’ldirilmoqda: “Oilani “kambag‘allik chegarasidagi oila” toifasiga kiritish yoki uning yordam tayinlash haqidagi arizasini ko‘rib chiqish faqat idoralararo ma’lumotlarning kechikishi yoki vakolatli organlar axborot tizimlaridagi nosozlik sababli kechiktirilgan bo’lsa va tekshiruv oila bunday kechikishsiz ariza qonuniy hal etilishi lozim bo’lgan paytda toifaga kiritish va yordam olishning dastlabki shartlariga mos kelganligini aniqlasa, vakolatli organ asoslantirilgan qaror bilan, faqat yordam maqsadlari uchun, toifaga kiritishning himoyalangan sanasini kechikishsiz ushbu toifaga qonuniy kiritilishi lozim bo’lgan sana sifatida belgilaydi; amalda texnik kiritilgan sana alohida saqlanadi.	Section IV requires a Presidential amendment to the higher-ranking Decree, coordinated with the implementing provisions. This self-contained exception defines the protected date, single window, lawful commencement, eligible arrears and prospective initial-submission scope.

Current wording	Proposed wording	Justification
PF-258, 5-band “v” (i) (davomi)	Himoyalangan sana Reyestrda qayta baholash yoki davlat ijtimoiy qo‘llab-quvvatlashning boshqa choralari muddatlarini qaytadan boshlamaydi va boshqacha tarzda o‘zgartirmaydi. Ushbu bandda belgilangan davrdan istisno tariqasida yordam olish huquqi toifaga kiritishning himoyalangan sanasi tegishli bo‘lgan oydan keyingi olti kalendar oy bilan cheklanadi. Ko‘rib chiqish, amalda kiritish yoki to‘lovning kechikishi ushbu davrni qaytadan boshlamaydi yoki uzaytirmaydi yoxud yordam olish huquqi mavjud bo‘lgan qo‘shimcha oyni yuzaga keltirmaydi.	Continuation of the same proposed paragraph.
PF-258, 5-band “v” (i) (davomi)	To‘lovga, shu jumladan davr tugaganidan keyin to‘lanadigan to‘lanmagan summalariga, faqat yordamning qonuniy boshlanishidan boshlab, shu davr ichidagi oila yordam olishning qo‘llaniladigan shartlariga mos kelgan oylar uchun, muddatidan oldin to‘xtatishning boshqa qonuniy asoslari va qonunchilikda belgilangan tartibga rioya etilgan holda yo‘l qo‘yiladi; bir oy uchun avval to‘langan summalar takroran to‘lanmaydi.	Continuation of the same proposed paragraph.

Current wording	Proposed wording	Justification
PF-258, 5-band “v” (i) (davomi)	Ushbu istisno faqat yordam tayinlash haqidagi dastlabki murojaat hamda, Reyestrga kiritish ham so‘ralgan bo‘lsa, unga bog‘liq Reyestrga kiritish haqidagi dastlabki murojaat ushbu istisno va muvofiqlashtirilgan amalga oshirish normalari kuchga kiradigan sanalardan kechrog‘ida yoki undan keyin birinchi marta taqdim etilgan hollarga qo‘llaniladi. Takroran yoki qaytadan taqdim etilgan murojaat dastlabki taqdim etish sanasini o‘zgartirmaydi va olti oylik davrni qaytadan boshlamaydi.”.	Continuation of the same proposed paragraph.
